**Mary Bjerregaard**

Attended a

*Two Day Intensive Course  
For Dog Trainers*

Tutor Feedback: -

During the practical course, we were able to work with and observe a number of dogs with very different temperaments. Mary needed very little instruction when we worked with an extremely fearful young dog who finds new people terrifying. Mary was able to engage fully with the dog including play in a very short space of time.

Mary has a welcoming, calm and quiet manner, putting dogs at ease. She always allows them to approach her and is very aware of her own body language and the dogs space. Mary is very intuitive both with dogs and clients and has great observational skills.

We attended a behaviour consult where the resident dogs had begun fighting and were actually present when a fight broke out. Mary remained calm and focused at all times. Mary was able to recognise various behaviours that were displayed during training and understand why the dog was acting in this way.

She has a lovely relaxed, approachable and friendly manner with people, is able to empathise while remaining professional at all times and all clients engaged well with her.
